beautiful visual Harmony

about us

Startree Liner Laminates provide a long-lasting and visually appealing surface for the interiors of cabinets and drawers. They also increase the dimensional stability of substrates that have been treated with high-pressure decorative laminate. In regular use, they provide balance and protection from the effects of humidity. These laminates are of exceptional quality and are designed specifically for installation on the backside of both residential and commercial structures.

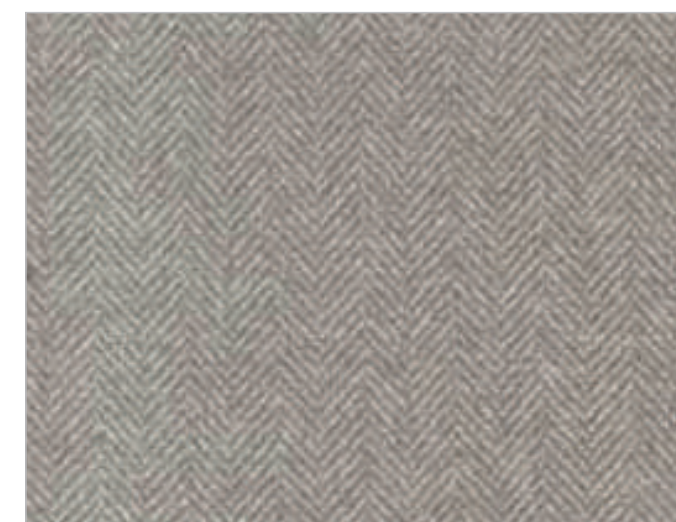

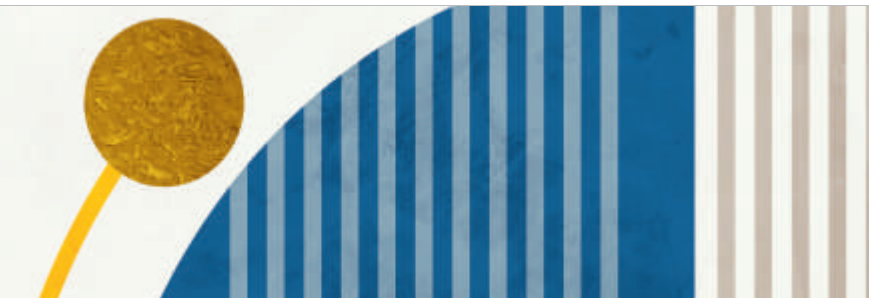

They are manufactured with precision to ensure appropriate thickness for shelves, drawers, cabinet doors, and other surfaces. Although the Liner collection of laminates is primarily used for residential furniture and cabinetry, they are also useful in providing an eye-catching lining and face surfacing for hidden sections.
