Designs

Louvers wall paneling refers to the use of louvers, which are angled slats or blades, as a decorative and functional element on walls. Louvers can be arranged in a horizontal or vertical pattern to create visually appealing designs while providing ventilation and light control. Louvers wall paneling adds texture, depth, and architectural interest to interior or exterior spaces, making it a versatile and popular choice for both residential and commercial applications.

Dimension: 8'X0.5'

Applications: Used to beautify all Interior walls and Ceilings in homes, offices, hotels, healthcare, education institutes, health clubs, recreation facilities, etc.
